

Contents

	Introduction	4
Part 1: Introduction to Quantitative Reasoning	1 Probability and risk	6
	2 Working with formulae and spreadsheets	19
	3 Percentages	30
	4 Roughly speaking	41
	5 Financial problem solving	52
	6 Working with data	63
	7 Representing the real world graphically	85
	8 It's Normal	97
	9 Working with exponentials	110
	10 Measures and scaling	121
Part 2: Critical Maths	11 Fermi estimates	133
	12 Probability in medicine and law	142
	13 Is it for real?	154
	14 Business and risk	166
	15 Making decisions	178
	16 Trialling, sampling and bias	187
Part 3: Statistical Problem Solving	17 Problem solving with the Normal distribution*	197
	18 Using statistics to solve problems	211
	19 Hypothesis testing and the chi-squared test	230
	20 Bivariate data	244
	Answers	257
	Index	283
	Photo credits	288

* Chapter 17 covers content that is in both Part 2: Critical Maths and Part 3: Statistical Problem Solving.
